Connecting to Wifi on the McMinnSchools network

McMinn County Schools provides WiFi access to teachers, staff and students. In accordance with the Child Internet Protection Act (CIPA), McMinn Schools may require users to install a certificate for authentication in order to get on the network in the McMinn School System.

Getting online
Connect to the McMinnSchools wifi network, using your McMinn Schools email address and password.

Follow the instructions below to put the certificate on your device to use it with our wifi.

Security Certificate Installation Instructions (one time process)
After you complete the process you may need to restart your phone/device.

Windows PC's ← Windows PC
On the device you are wanting access on
Download the installer [here](#)
Run the installer - you need admin rights on your device to do this.

iPhone or iPads ← iOS Devices (iPad/iPhone)
On the device you are wanting access on
Download the certificate [here](#) within Safari.
Click on the downloaded file and press the Install button.
You will be prompted with a warning message that says, "Installing this profile will change settings on your (Device)." Press the Install Now button.

Android Devices ← Android Devices (phones and tablets) - please note - you must have a screen pattern lock or password on your device to be able to do this.
On the device you are wanting access on
Download the certificate from [here](#). Open with defaults.
At the Name the certificate screen give the certificate a name (whatever you like) and press the OK button.

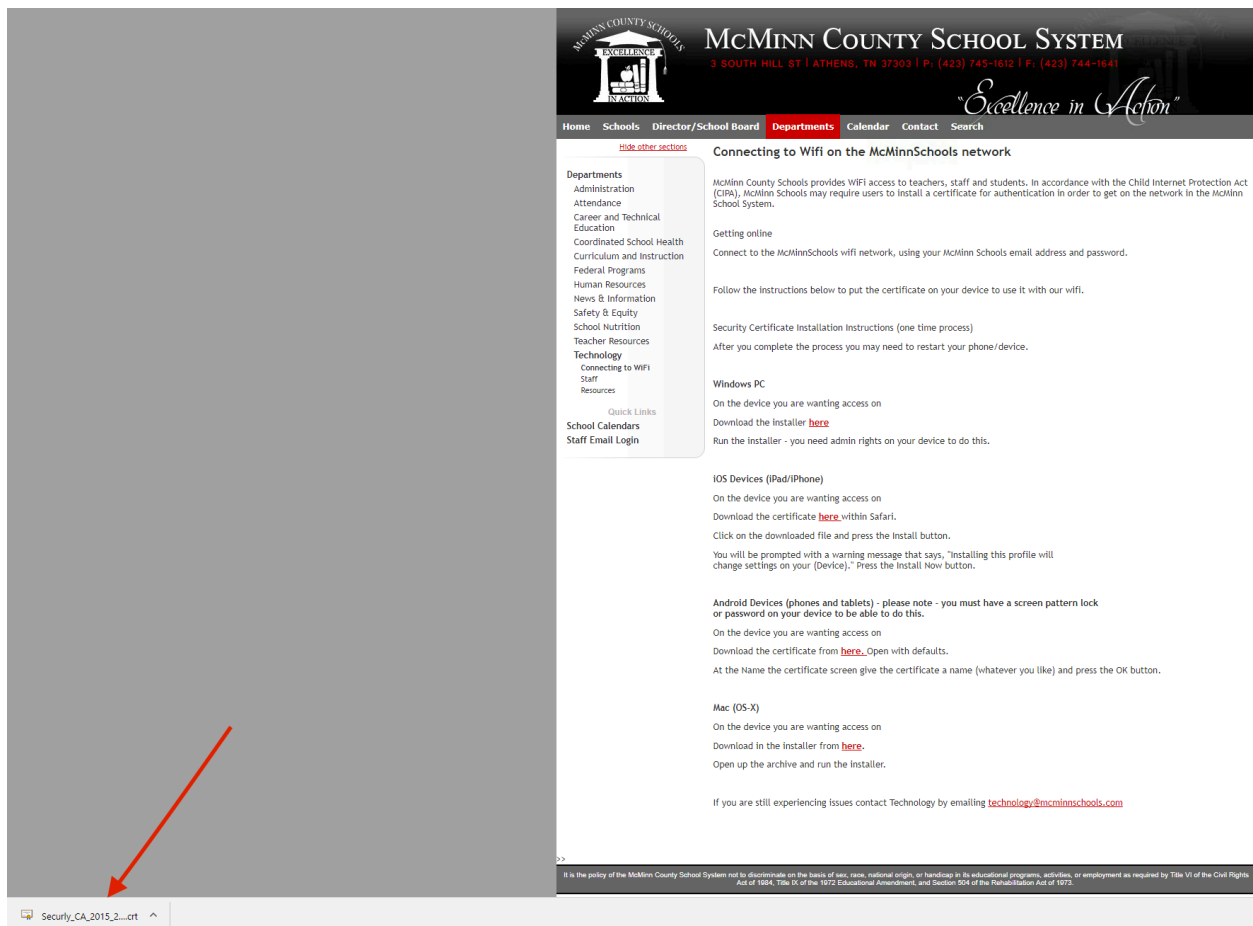

Apple iMac or MacBook ← Mac (OS-X)
On the device you are wanting access on
Download in the installer from [here](#).
Open up the archive and run the installer.

If you are still experiencing issues contact Technology by emailing technology@mcmminnschools.com

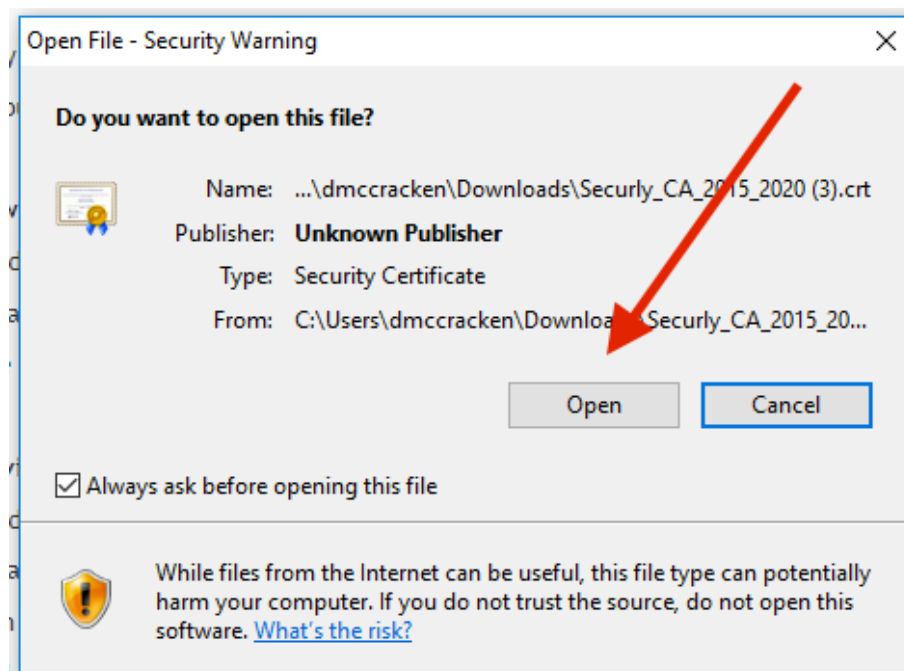

>>

2. Click on the appropriate link to download the certificate for your device or operating system

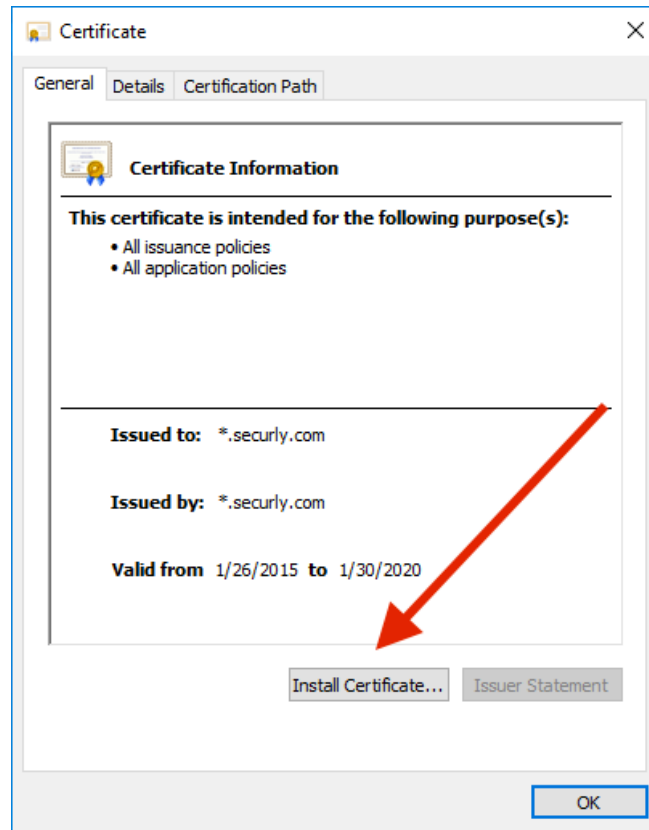

3. Once downloaded, click on the downloaded file in the lower left of your screen

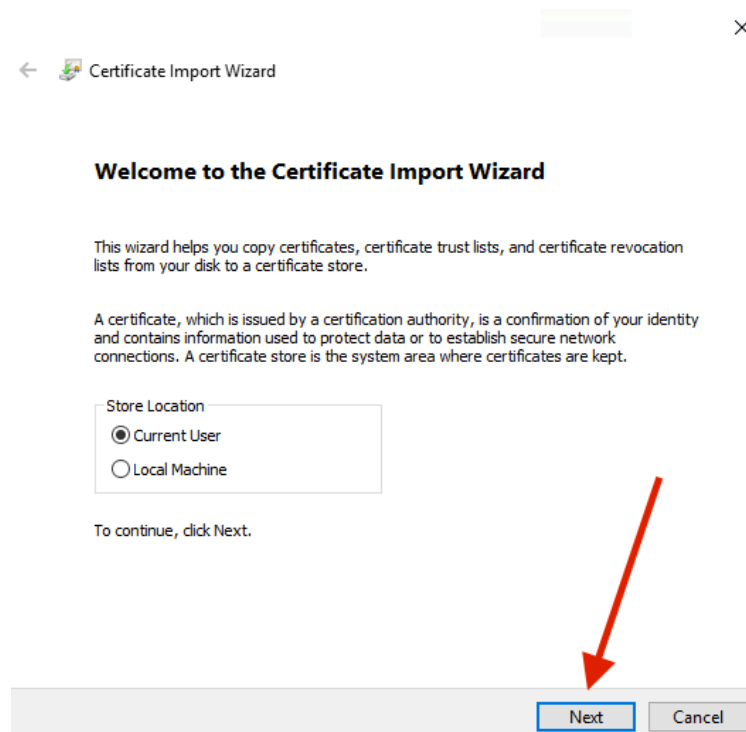

4. Click “Open” in the box that appears when opening the clicked file

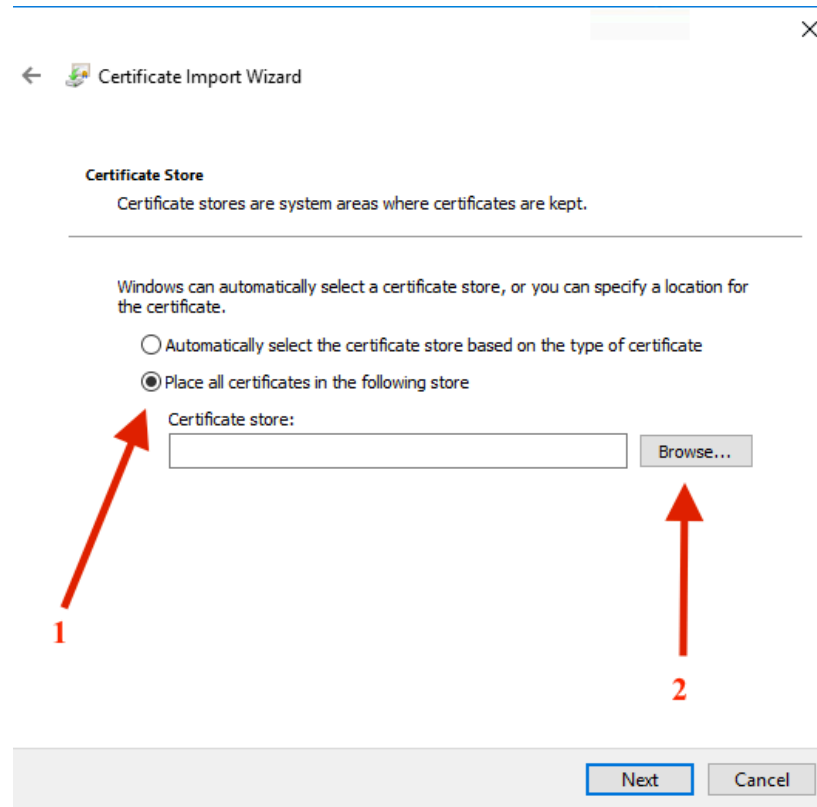

5. Click install certificate

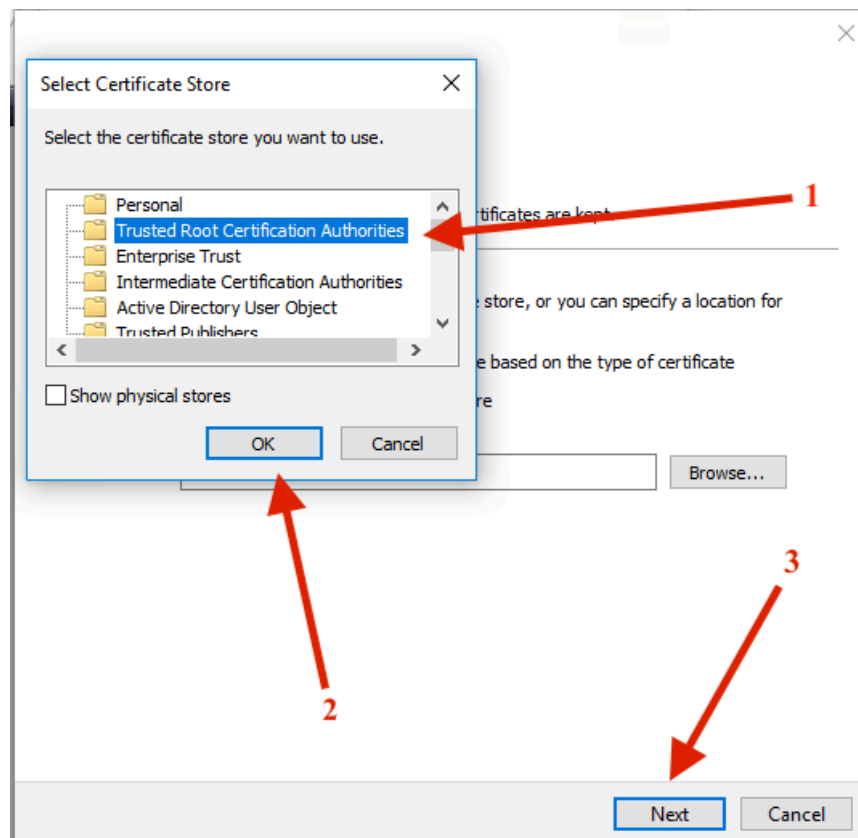

6. Leave “current user” checked and click next

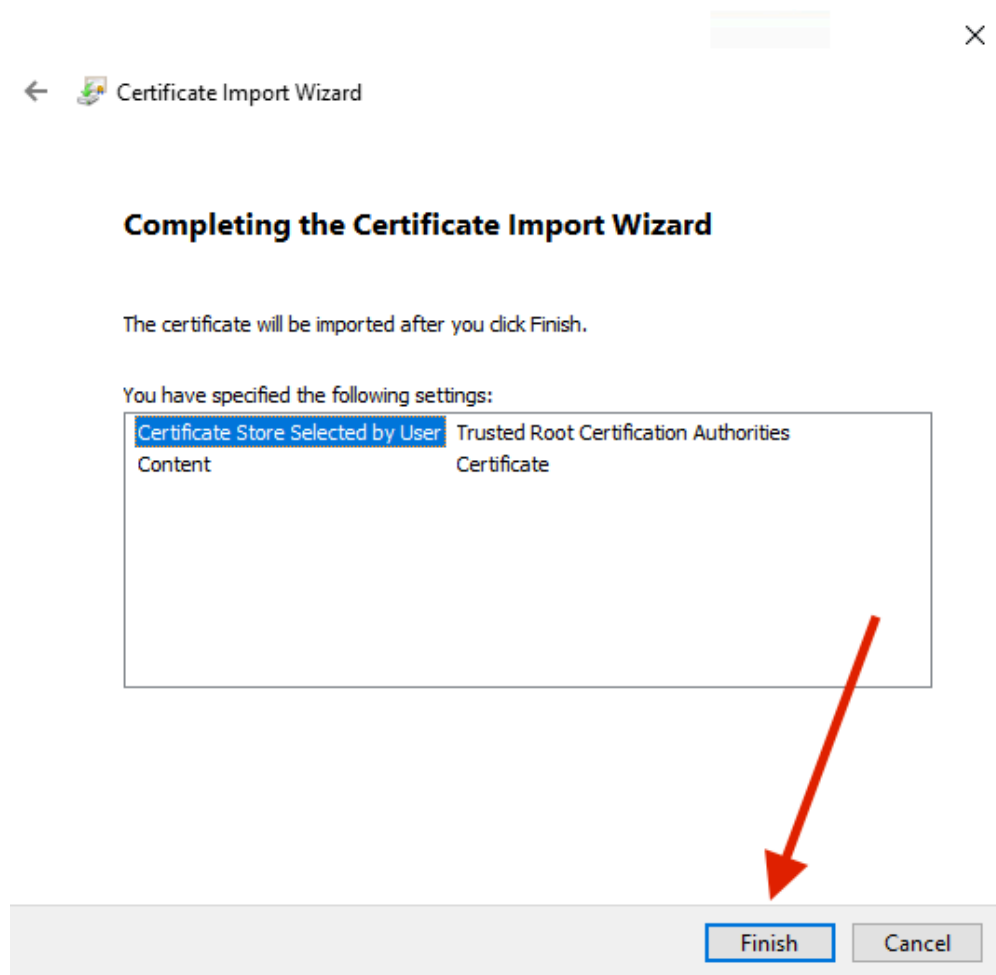

7. Check “Place all certificates in the following store” then click “Browse...”

8. Choose “Trusted Root Certification Authorities” and click “OK” and “Next”

9. Click “Finish”.

You should now be able to browse the internet using Google Chrome
